

TURN IT UP!

Over the past year, the pace of digitization has dramatically accelerated in industrial environments.

The IoT sessions and demos selected for Cisco Live Global 2021 are designed to help you simplify and accelerate digitization of your industrial, transportation and field asset use cases in a secure way that meets the needs of your operational and IT support teams.

Step 1: [Register for Cisco Live Global 2021](#)

Step 2: [Search IoT in the Session Catalogue](#)

Step 3: Select Session of Interest

(Note: PSO and Demos require only a registration, BRK requires an all-access pass)

Step 4: Watch Demos for deeper details

Step 5: [Book a Meeting with Experts](#)

Leverage Your Cisco Network for IoT Use Cases

You already trust Cisco with your best-in-class network. Extend your network to outdoor and industrial spaces to enable a wide range of new innovative solutions and use cases.

Demystify Industrial Wireless

With an abundance of wireless technology options, you need to pick the right technology for your deployment or risk driving up complexity, costs and security risks. Learn how to pair cost effective connectivity – from Wi-Fi, LoRaWAN, Mesh, Wi-SUN, public or private cellular, and more – with your unique operational requirements to drive success in your IoT industrial deployments.

Bring Visibility Across the Enterprise Using Sensors and IoT Solutions

Improve efficiencies, safety and business resiliency by providing visibility into IT and operational technology (OT) industrial spaces. This track will focus on new solutions from Cisco IoT and Meraki that accelerate digitization and empower OT/IT collaboration simply, securely and at scale.

Secure Your Industrial Networks

Cybersecurity threats on industrial operations continue to accelerate. Learn how to implement a simple, scalable and pragmatic approach to secure your industrial network, protect your industrial assets and leverage your IT security practice to extend Zero Trust to your industrial settings.
